SOVIET JOURNAL OF AUTOMATION AND INFORMATION SCIENCES

CONTENTS FOR 1987

Number 1

	English Page	Russian Page
INFORMATION PROCESSING METHODS		
N.A. Ivakhnenko, I.Lu, L.P. Semina, and G.A. Ivakhnenko: Objective Computer Clusterization Part 2. Use of Information about the Goal Function to Reduce the Amount of Search	1	3
Yu.P. Yurachkovskiy: Use of Karhunen-Loeve Expansion to Construct a Scalar Convolution of a Vector Criterion (on an Example of Estimating the Quality of Continental Surface Waters)	14	17
L.A. Koval'chuk, I.V. Chernyshov, and V.Yu. Yankauskas: Estimation of the Quality of Probabilistic Forecasts (a Review)	23	26
M.M. Lychak: A Generalized Variance Function of Random Disturbances and Multiple Estimates of the Values of the Noise	28	31
IDENTIFICATION OF COMPLEX SYSTEMS		
A.G. Ivakhnenko and V.S. Stepashko: Structural Identification as a Problem of Extracting a Signal from a Noise Background	34	37
DYNAMICS OF CONTROL SYSTEMS		
L.N. Volgin: Diophantine Polynomial Calculus and Its Application to the Solution of Mathematical Problems in Control Theory (a Survey)	40	43
N.F. Kirichenko and P.P. Lepekha: A System for the Formation of Invariant Key Features in Problems of Recognition of Flat Images	50	52
RELIABILITY AND TECHNICAL DIAGNOSTICS		
V.I. Adasovskiy and V.I. Skurikhin: Modeling the Functional State of Multidimensional Dynamic Objects	58	61
CONTROL IN BIOLOGY, ECOLOGY, AND MEDICINE		
L.A. Sirenko and Ye.P. Buravlev: Entropy Estimation of Ecological Factors of Anthropogenic Actions on a Body of Water	64	67
B.I. Yatsalo: Prediction of the Dynamics of Ecological Systems	67	69
BRIEF NOTES		
N.I. Bezmenov, Yu.T. Kostenko, and O.N. Malykh: A Decompositional Approach to Grouping of Parameters	71	73
G.A. Dmitriyev and V.F. Komissarchik: A Multidimensional Discrete Stabilization System with Prediction of Regulable Variables	76	76
V.D. Dmitriyenko: An Algebraic Method of Synthesizing Finite Automata Using Algorithms for Self-Organization of Models	82	81
S.F. Kozubovskiy and V.V. Kupriyanov: Use of GMDH to Optimize the Basic Parameters of a Jet System for Measuring Velocities of Air Streams	85	84

	English Page	Russian Page
M.I. Mamedov and N.A. Ivakhnenko: Forecasting Model of Air Pollution of an Industrial City	90	88
V.P. Tarasenko and Z. Haddad: Program Checking of Multiplication	93	90

Number 2

METHODS OF DATA PROCESSING

N. M. Babayan and P. M. Brusilovskiy: Optimal Hybrid Predictors of Alternative Predictions with Respect to Linear Criteria	1	3
L. M. Boychuk: Invariant Filtering of Discrete Processes	9	10
A. G. Ivakhnenko and A. P. Kritskiy: Logical Extrapolation of the Locus of the Minima of the Consistency Criterion in the Problem of Recognition of Speech Signals	16	17
S. N. Bevz: Aggregation of Attributes by the Consistency Criterion	21	22
A. P. Sarychev: A GMDH Iteration Algorithm for Modeling Random Fields in a Certain Class of Superposition of Two-Dimensional Beta Distributions	25	25

THE USE OF COMPUTERS IN ECONOMIC AND ORGANIZATIONAL SYSTEMS

Yu. P. Triseyev: Approaches to the Solution of Mathematical Programming Problems on the Basis of Heuristic Self-Organization	30	31
A. V. Kuntsevich: An Algorithm for Solving the Problem of Optimal Speed for Linear Discrete Control Systems	38	39
V. N. Kurovskiy: Search for a Global Optimum in Practical Combinatorial Problems	44	44
V. I. Gostev: A Table of Transfer Functions of Optimal Digital Controllers	50	52
V. I. Gurman and L. I. Ivanova: Models and Analysis of Ecological-Economic Systems	54	55
V. A. Dem'yanyuk, G. A. Ivakhnenko, and A. P. Makarovskiy: Digital Filtering of the Signals of Laser Positioning Transducers in Numerically Controlled Machine Tools	58	58
V. G. Zaytsev and V. Ye. Kapustyan: Application of the Method of Characteristics for Constructing Optimal Controls in the One-Phase Stefan Problem	60	60
N. A. Zinchuk: Facilities for Creating a Generalized Dialog Language	64	63
A. G. Ivakhnenko: On Absolute Invariance Conditions for Automatic Systems	67	83

REVIEWS AND LETTERS TO THE EDITOR

On the Principles of Programming of Systems Which Model Intelligence	74	89

BRIEF INFORMATION

V. I. Gostev: Determination of Optimal Controls for Linear Controlled Objects in Digital-Regulator Control Systems	79	56
N. A. Zinchuk: Synthesis of Stack Automata	85	61
V. N. Zolotarev and V. A. Zhukov: An Algorithm for Constructing a Nonlinear Statistical Model for Forecasting Air Temperature in the Near-Ground Layer of the Atmosphere	89	64

Number 3

INFORMATION PROCESSING METHODS

G.I. Krotov and S.F. Kozubovskiy: Verification of Dendroscale Forecasting by a Multiplicative GMDH Algorithm	1	3

	English Page	Russian Page
IDENTIFICATION OF COMPLEX SYSTEMS		
A.V. Primak: Models for Comprehensive Assessment of Total Pollution of Atmospheric Air (a Survey)	8	10
N.A. Semenov and Ye.V. Malinovskaya: Structural-Parametric Identification of Polynomial Models Based on GMDH Algorithms and Brandon's Method	17	20
V.V. Malyshev, A.I. Kibzun and D.E. Chernov: Two Approaches to the Solution of Probabilistic Optimization Problems	20	29
R.V. Zaytsev, A.I. Sibirko, V.I. Biletskiy, I.A. Vasilevskiy and L.A. Matviychuk: Optimization of Engineering Preparation in the Road Construction Process	26	36
F.G. Garashchenko and M.M. Primak: Practical Stability Criteria for Distributed-Parameter Systems	32	43
THE USE OF COMPUTERS IN ECONOMIC AND ORGANIZATIONAL SYSTEMS		
Yu.P. Triseyev: Modifications of GMDH Algorithms for Systemic Forecasting	35	47
I.V. Goleusov and S.A. Kondrasheva: Comparative Analysis of the Interdependence Structure of the Macro-Economic Indices of Comecon Member-Countries by the Group Method of Data Handling	39	51
BRIEF COMMUNICATIONS		
V.A. Kas'yanov and Ye.P. Udartsev: Increasing the Stability of Estimates by the Least Squares Method	44	66
A.M. Luchuk and L.B. Malinovskiy: Hierarchical Codes	49	70
A.A. Ishchenko, B.D. Liberol' and O.G. Rudenko: Investigation of the Convergence of Identification Algorithms with Memory	51	68
V.M. Karas': Stability of Approximate Solutions of the Graph Partitioning Problem	55	72
Sh.A. Kiyasbeyli and V.M. Mamedov: Differences between Fuzzy Set and Probability Theories	60	76
S.F. Kozubovskiy and V.V. Kupriyanov: Design of Automatic Systems for the Control and Protection of the Air Environment on the Basis of GMDH	63	78
I.V. Samus: Digital Correction as a Method of Increasing the Accuracy of Analog-Digital Devices	67	82
A.I. Yastremskiy and N. Uteuliyev: Modeling Possibilities of Two-Step and Multistep Stochastic Models	70	84
DISCUSSION		
I.D. Mandel' and B.G. Mirkin: Cluster Analysis and Related Problems (Brief Review of Basic Trends)	74	72
A.G. Ivakhnenko: The Fuzzy-Language Analog of a Physical Model of the Mechanism of an Observed Object	85	89
A.G. Ivakhnenko: Conditions for Absolute Invariance of Automatic Systems	87	90
Young Scientists' Competition	88	91

Number 4

METHODS OF DATA PROCESSING		
V.I. Vasil'yev, F.P. Ovsyannokova, and K.A. Bekmuratov: The Separating Force of Features in Problems of Recognition Learning Based on the Method of Limiting Simplifications	1	3

	English Page	Russian Page
A.M. Sharadkin, A.A. Molchanov, and N.N. Kubyshkin: The Influence of the Error of Discrete Reading Sampling on the Representation of Signals by Means of a Kotel'nikov Series	7	9
IDENTIFICATION OF COMPLEX SYSTEMS		
V.V. Atroshchenko, P.M. Brusilovskiy, and A.M. Fridlyand: A Group of Models for Identifying Complex Technological Plants	12	14
Yu.I. Belyayev: Synthesis of Linear Schemes for Estimating a Scalar Field by the Method of Stochastic Interpolation	18	20
M.Z. Zgurovskiy, A.N. Selin, and M.I. Mamedov: Estimation of the States and Parameters of Atmospheric Processes with the Use of a Combined Approach	26	29
V.F. Irodov: The Construction and Convenience of Evolutional Algorithms of Random Search for Self-Organization	32	34
G.K. Krug and V.A. Shikhin: Discrimination of Competing Models in Problems of Simulational Modeling	42	44
V.S. Stepashko and Yu.V. Kostenko: A GMDH Algorithm for Two-Level Modeling of Multidimensional Cyclic Processes	49	51
Yu.P. Yurachkovskiy: Construction of Quadratic Criteria of Discrimination of Models	58	60
ROBOTS AND ARTIFICIAL INTELLIGENCE		
A.D. Gol'tsev and E.M. Kussul': Maneuvering Tactics for a Transport Robot on the Basis of Range-Finder Information. Part 2. Taking into Account the Own Dimensions of an Autonomous Transport Robot	65	66
OPTIMAL CONTROL AND PLANNING		
V.S. Ponomarenko, Yu.I. Kuz'menko, and I.N. Golovanov: Multicriterial Planning of Regimes for the Control of Spring Floods (On the Example of the River Dnieper)	69	24
B.G. Boychuk: Deductive Synthesis of Linear Automatic Control Systems	75	70
V.L. Volkovich, V.M. Voynalovich, and V.I. Kudin: A Relaxational Scheme of the Row Simplex Method	84	79
BRIEF COMMUNICATIONS		
A.M. Bukchin: A Procedure for Estimating the Probabilities of Processing Time-Sensitive Requests in a Queueing System with Cost-Dynamic Resource Control	91	87
Ye.A. Levenets and E.I. Fedan: A Hybrid Dynamic Complex for Combined Prototype-Simulation Modeling of the Stochastic Part of Information Control System	94	89

Number 5

A.G. Ivakhnenko: Objective Clusterization on the Basis of the Theory of Self-Organization of Models	1	6
V.M. Kuntsevich and M.M. Lychak: Control Under Indeterminacy Conditions (Synthesis of Adaptive Control Systems)	10	16
V.I. Vasil'yev: Learning in Technical Systems	21	26
V.I. Ivanenko: Some Questions Regarding Indeterminacy and Dynamics in Control Problems	31	38
K.Ya. Kukhta and V.P. Kravchenko: Controlled Dynamical Systems with Continuous-Discrete Parameters	42	49
K.A. Ivanov-Muromskiy: Neurobionics: Development and Prospects	51	58
DATA-PROCESSING METHODS		
V.E. Kraskevich, I.I. Kovalenko, A.P. Makarovskiy, and G.A. Ivakhnenko: Analysis of Random Spatial Images	56	65

	English Page	Russian Page
BRIEF COMMUNICATIONS		
A.G. Ivakhnenko and L.M. Boychuk: Ensuring a Given Motion of an Invariant Servo System (As Applied to the Construction of Differentiators)	62	71
A.M. Bukchin: A Single-Line Queueing System with Variable Order of Servicing of Clients Generating Short-Term Orders	65	73
V.I. Gostev: A Table of Transfer Functions of Optimal Digital Regulators for Linearly Varying Inputs	69	76
A.P. Rotshteyn: Probabilistic-Algorithmic Models of Man-Machine Systems	74	81
N.A. Semenov, V.S. Stepashko, and A.V. Zhgutov: Combined Use of Applied Program Packages to Solve Problems of Parameter Optimization of Technological Processes	80	86
A.V. Ushakov and A.A. Dzhamanbaev: A Geometrical Approach in the Problem of Finding a Class of Regulators that Ensure Zero Parametric Sensitivity	84	89

Number 6

V.V. Pavlov: The Human Factor in Technological Systems and Effectiveness	1	5
M.M. Dargeyko, A.A. Loginov and Yu.I. Samoylenko: Control of Rapid Processes in Continuous Conducting Media	6	11
P. Eykhoff: A Bird's-Eye View on Parameter Estimation and System Identification	15	21
G.G. Aralbayeva and A.D. Sarychev: Prediction from Spectral Characteristics Based on the GMDH Algorithm of the Anode Effect in an Aluminum Electrolyzer	39	38
V.L. Volkovich and Yu.P. Chaplinskiy: Algorithms for System Optimization in Linear Models when the Directive Region is Given by Balance Relationships	46	45
Yu.P. Zaychenko and V.N. Gnatovskiy: Topological Design of Computer Network on the Basis of a Combination of Analytical-Simulational Models	55	53
A.G. Ivakhnenko and A.P. Kritskiy: Regularization of Solutions in the Problem of Signal Recognition Using the Locus of the Minima of the Maximum Likelihood Criterion	63	60
Yu.L. Kocherga: Minimax Control Optimization in Hydrological Processes	67	63
G.I. Krotov and Yu.V. Kostenko: An Algorithm for Self-Organization of Additive-Multiplicative Models of Complex Systems	73	69
DYNAMICS OF CONTROL SYSTEMS		
E.M. Solnechnyy: Investigation of the Stability of a Shchipanov System of Intentionally Introduced Small Stabilizing Inertialities	79	74
ADAPTIVE CONTROL		
V.I. Vasil'yev, Yu.I. Gorelov and Z.D. Usmanov: Synthesis of Optimal Simulational Control in Systems with Cyclic Technology	84	79
BRIEF NOTES		
V.M. Andropov: Analytical Methods of Analyzing the Functioning of Distributed Multi-Microprocessor Systems	89	83
D.I. Zelinskiy: Influence of Speed of a Moving Subscriber on the Noise Immunity of a Frequency-Time Code Receiver	93	86
